ASSISTIVE TECHNOLOGY. Georgia State Rule

(a) Children with disabilities who require assistive technology in order to receive a free appropriate public education (FAPE) are eligible for assistive technology devices or services, or both, as a part of the child’s special education, related services, or supplemental aids and services.

(b) Each IEP Team will consider whether or not a child requires assistive technology devices and services in order to receive a free appropriate public education (FAPE). Minimal compliance will be indicating the appropriate response in the Consideration of Special Factors section of the IEP. Assistive technology can also be addressed when considering other factors such as communication needs and instruction in the use of Braille. [34 C.F.R. § 300.324]

(c) An assistive technology evaluation may be required if appropriate assistive technology solutions are not known to the child’s IEP Team through the consideration process. This evaluation shall be conducted by a multidisciplinary team of professionals knowledgeable about assistive technology devices in the technology areas being assessed. The child and family should also be included in this evaluation process. The evaluation should result in recommendations for assistive technology devices and services, if required.

(d) If the child’s IEP Team determines that assistive technology devices or services are required for the child to receive a FAPE, a statement to that effect must be included in the child’s IEP.

1. If assistive technology is required for the child to participate in districtwide or Statewide testing, the need for technology should be documented in the appropriate section of the IEP and provided to the child.

2. If assistive technology devices or services, or both, are required for a child who is blind or other print disabled to access alternative format instructional materials, the assistive technology should be documented in the IEP and provided to the child. .02-8 FAPE

(e) If the IEP Team determines that the child with a disability requires school purchased assistive technology at home or in other settings to receive a FAPE, the assistive technology must be provided to the child at no cost to the parent. The need for assistive technology in the non-school settings should be documented in the child’s IEP. [34 CFR § 300.105] (Authority O.C.G.A. 20-2-150; 20-2-152)
IEP

(b) Consideration of special factors.

The IEP team must –

1. In the case of a child whose behavior impedes the child’s learning or that of others, consider the use of positive behavioral interventions and supports and other strategies, to address that behavior in the IEP or behavioral intervention plan;

2. In the case of a child with limited English proficiency, consider the language needs of the child as those needs relate to the child’s IEP; .06-8 INDIVIDUALIZED EDUCATION PROGRAM (IEP)

3. In the case of a child who is blind or visually impaired, provide for instruction in Braille and the use of Braille unless the IEP Team determines, after an evaluation of the child’s reading and writing skills, needs and appropriate reading and writing media, that instruction or the use of Braille is not appropriate for the child;

4. Consider the communication needs of the child, and in the case of a child who is deaf or hard of hearing, consider the child’s language and communication needs, opportunities for direct communications with peers and professional personnel in the child’s language and communication mode, academic level, and full range of needs, including opportunities for direct instruction in the child’s language and communication mode; and

5. Consider whether the child needs assistive technology devices and services. [34 C.F.R. § 300.324(a)(2)(i) – (v)]
