The **Universal Design for Learning Lab (UDLab)**, is an assistive technology model classroom located in the Bagwell Education Building Room 217. The purpose of the Universal Design for Learning Lab (UDLab) is to assist Kennesaw State University (KSU) in fulfilling its commitment to provide equal access to curriculum and instruction for diverse learners across the preschool-college career trajectory.

The **Avatar Lab in the Bagwell College of Education** is a new laboratory where Kennesaw State students and faculty utilize mixed-reality technology to interact with avatars of children and adults, simulating a variety of situations and challenges teachers can encounter. The student avatars each have their own unique personalities, and the scenarios have low, medium and high settings requiring varying levels of problem-solving.

The **ITEC Innovation Lab** was established in Spring 2018 by the Department of Instructional Technology with a bold vision to serve as Bagwell's incubator for educational innovation--where ideas are born and tested! The Innovation Lab serves KSU faculty, staff, students as well as K-12 students, teachers, leaders, district personnel and other key strategic partners
